

CLAIMS

1.- Accessory for drinking glasses, that cools or maintains the temperature of the contents of the drinking glass, at the same time protecting the outside from the direct action of the sun, and which acts as an advertising or informative carrier, basically characterised in that it is made up of a thermal clamp (1) that is adapted to the shape of the drinking glass (2) having an extension (3) fitted at a point on its perimeter, at the free end of which there are some connection elements (4) in order to fit a rod (5), and which in turn has at the counter end some connector elements (6) to fix to the body (7) and which acts as an advertising or informative carrier.

2.- Accessory for drinking glasses, according to the above claim, characterised in that the rod (5) has a connector element (8) at a point on its perimeter in order to clip onto the rim of the drinking glass to prevent the thermal clamp from sliding down the drinking glass.

3.- Accessory for drinking glasses, according to claim 1, characterised in that the connector elements (6) of the rod and the advertising or informative body (7) allow the body to turn on the rod, and thus be placed in the most suitable position.

4.- Accessory for drinking glasses, according to claim 1, characterised in that the advertising or informative body (7) is suitable for inscriptions.
